Delivery Lead – Large-Scale Public Sector IT Delivery, TwoDay

I see myself as a direct fit for this Delivery Lead role. My career spans hands-on engineering leadership and large-scale programme direction, giving me the technical depth and governance discipline required to mobilise and steer Twoday's public-sector initiative from day one.

Proven Capabilities & Impact

- **Programme Leadership at Scale:** I have owned multi-million-DKK deliveries of business-critical systems, including the **DKK 250M** global ERP/CRM transformation at Radiometer across 40 countries, the **DKK 30M** mission-critical Ticketing & Booking replacement at Scandlines, and data/AI platform mobilisations at PFA. In each role, I established steering-committee governance, cross-functional risk frameworks, and transparent dependency management.
- **Transition & Mobilisation:** I have built delivery organisations from the ground up. At ShapeGames, I established a cross-functional delivery model and governance framework during a complex two-year post-merger transition, aligning multiple agile product streams through a centralised enterprise roadmap. At Objective Corporation, I introduced agile and QA practices that delivered the company's first on-schedule release in ten years.
- **Public-Sector & Regulated Delivery:** I have designed agile delivery governance and operating models for **Erhvervsstyrelsen**, **SKAT**, and **Miljøstyrelsen**—where I delivered the first green accounts system in a cross-organisational agile setup. I also bring deep experience navigating regulated life-science, medical, and GDPR-intensive environments at Radiometer, Novo Nordisk, and PFA.
- **Multi-Supplier & Vendor Management:** I have repeatedly served as the vendor-side delivery lead for complex enterprise engagements. At ConfigIT, I directed a multi-supplier consulting team for a global client, managing delivery commitments, stakeholder alignment, and cross-border dependencies across virtual teams in Europe, the US, and India.
- **Engineering & Organisational Leadership:** I have led multiple technical teams simultaneously while maintaining modern engineering practices. At Amboss, I scaled engineering from 20 to 100+ employees and led a lean-agile transformation of 140 medical doctors, aligning technical direction with executive growth strategy without losing delivery velocity.
- **Agile Governance & Planning Discipline:** My background spans planning, governance, and execution at scale. From running the day-to-day agile ceremonies for teams at Objective and Amboss to managing enterprise roadmaps across multiple product streams, I bring deep expertise in sprint planning, PI cadences, backlog coordination, and end-to-end technical project management.
- **Regulated Domain Depth:** Early project engineering roles at NNE and Novo Nordisk, combined with directing Radiometer's global digital transformation, give me strong fluency in the quality, compliance, and documentation standards required in public-sector and regulated IT delivery.

I offer a rare combination of **technical breadth, vendor governance, and stakeholder clarity**. I am ready to align your agile teams, manage complex supplier ecosystems, and build transparent, long-term partnerships with Twoday's customers.

Work history

ShapeGames A/S — Head of Operations

Copenhagen, Denmark

2023 – 2026

- Established a new cross-functional delivery organisation and governance model during a complex two-year transition, leading multiple agile product streams through a centralised enterprise roadmap and 5-sprint

Scrum PI cadence.

- Restructured the enterprise customer engagement model, transitioning delivery managers to a strategic, product-centric advisory approach to streamline client feature requests.
- Managed cross-team delivery dependencies and embedded new contract scope directly into engineering backlogs, driving technical coordination between delivery management and product streams.
- Led transition and mobilisation of the delivery organisation through the two-year post-merger period, combining high-level corporate alignment with hands-on coaching and direct evaluation of legally compliant AI tooling to inform technical direction.
- Headed change management initiatives and established organizational governance frameworks across international steering committees to guarantee on-time feature delivery and mitigate transition risks.

Configit A/S — Senior Project Manager

Copenhagen, Denmark

2022 – 2023

- Provided delivery leadership across a multi-supplier vendor consulting team for a global, business-critical enterprise customer, driving stakeholder alignment and clear delivery commitments at every stage.
- Established governance and coordination across virtual delivery teams located in India, DE, US, UK and DK, with explicit focus on dependency management, risk mitigation and cross-border delivery predictability.

PFA — Senior Programme Manager

Copenhagen, Denmark

2021 – 2022

- Led delivery mobilisation for a new data/AI organisation, establishing governance and operating model through vendor contract negotiation, scope definition and creation of a master delivery roadmap that secured firm steering-committee and executive commitment.
- Directed technical platform readiness by scoping ML/AI capabilities and prioritising the development queue through an objective ROI framework, while validating data-driven business cases with cross-functional leaders.
- Navigated complex regulatory, security, and data compliance frameworks (including GDPR and Danish/EU data sovereignty), securing executive and regulatory approval for critical cross-functional initiatives.

Amboss — Head of Operations / Head of Agile Transformation / Engineering Management

Berlin, Germany

2018 – 2021

- Owned operational growth across the engineering organization, directly coaching the engineering management layer and designing core recruitment processes to safeguard cultural alignment and delivery velocity.
- Led the **lean-agile transformation** of the editorial department—comprising 140 medical doctors—optimizing the end-to-end medical content lifecycle from initial ideation and peer review through to publishing.
- Served as the primary conduit **aligning growth strategy** across founders, executive leadership, and engineering teams, driving organizational cohesion through active steering committee participation.

Radiometer — Head of Enterprise IT Transformation, Program Manager

Copenhagen, Denmark

2016 – 2017

- Oversaw a DKK 250M **global ERP/CRM transformation program** spanning 40 countries, driving standardization and operational health across a massive international footprint.
- Managed the global program as a disciplined portfolio, developing individual, **data-driven business cases** for each country based on objective benefit criteria and value realization.
- Established formal governance structures, multi-million DKK budget oversight, and executive steering frameworks across country leadership and C-level executives, successfully aligning highly diverse stakeholder groups.
- Proactively mapped, tracked, and mitigated cross-functional dependencies and risks, ensuring timely escalation and **high-impact decision-making** for complex global rollouts.
- Collaborated with international product, technology, and business units to standardize operating models, ensuring scalable delivery standards across 30+ countries.

Nine — Associate Partner and People Manager of Project Delivery

Copenhagen, Denmark

2015 – 2016

- Designed agile delivery governance and operating models for major Danish public-sector institutions, directing a multi-supplier delivery capability of 20 project managers and consultants while standardising the PMO framework for continuous capability building.

- Managed senior stakeholder relationships and governance across the Danish Business Authority, Taxation Office and Energy Agency, tying agile delivery models and review processes directly to delivery risk and dependency management.

Objective Corporation — Senior Engineering Manager

Sydney, Australia

2013 – 2015

- Coordinated feature development across multi-domain teams, balancing systems architecture, delivery discipline, and platform reliability at scale.
- **Transformed delivery and accountability** by establishing QA practices, CI/CD governance, and clear ownership structures—delivered the first on-schedule release in a decade and scaled to international operations (Philippines).
- Built through inclusive, coaching-oriented leadership that invested in capability at every level and cultivated a culture where teams took genuine ownership of outcomes.

Copenhagen Airports — Senior Programme Manager (Freelance)

Copenhagen, Denmark

2012 – 2013

- Led EU tender to select and implement a new website platform for 30M+ annual travellers; drove stakeholder alignment across business units and managed agile delivery with vendor governance to bring the platform live on schedule.
- Built business case and led workshops for an airport security workforce management system, capturing workflows and planning implementation.

Scandlines — Senior Programme Manager (Freelance)

Copenhagen, Denmark

2010 – 2012

- Owned DKK 30M **replacement of mission-critical Ticketing & Booking System** (commercial spine of the business); mapped requirements and workflows across the organisation to shape viable solution and transition approach.
- Ran vendor selection and coordinated bid process; established governance frameworks and executive steering to manage decisions, risks, and delivery readiness across a complex organisation.

Ciber Danmark — Manager of Agile Delivery

Copenhagen, Denmark

2008 – 2010

NNE / Novo Nordisk — Project Manager / IT Consultant

Copenhagen, Denmark

2001 – 2008

CP Kelco — Project Engineer

Copenhagen, Denmark

2000 – 2001

Insatech A/S — Project Engineer

Vordingborg, Denmark

1998 – 2000

Education, Certifications & Languages

Education

1998 B.Sc. Chemical Engineering (SDU) • 1992 Gymnasium (Viby, Aarhus)

Certifications

Prince2 Practitioner • Certified ScrumMaster • Certified Leadership Coach
